## OVERSEA MIGRATION.

Permanent migration refers to persons, other than Australian troops, intending residence for one year or longer—in Australia in the case of arrivals, and abroad in the case of departures. Temporary migration refers to persons intending residence for shorter periods, together with Australian troops from July, 1947, onwards, irrespective of length of intended residence.

 (b) Includes Northern Territory and Australian Capital Territory.

# AVERAGE WEEKLY TOTAL WAGES PAID AND AVERAGE EARNINGS.

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 80 per cent. of total employment) and from estimates of the unrecorded balance. Pay of members of the armed forces is not included. The figures are not seasonally adjusted. A seasonally adjusted quarterly index of average weekly wage earnings is published on page 2.

(a) Includes Australian Capital Territory. (b) Includes Northern Territory. (c) Total wages as above divided by total civil employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. The same ratio has been used in each State and because the average ratio of female to male earnings may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

# VALUE OF RETAIL SALES IN AUSTRALIA(a): COMMODITY GROUPS.

The figures in the table below relate to goods (as distinct from services, accommodation, entertainments, meals, &c.) sold to the public by establishments selling retail goods from fixed premises (shops, rooms, kiosks, yards) and include the retail sales of establishments principally engaged in wholesale, manufacturing or servicing activities. The table contains particulars of retail sales of goods for the years 1948-49 to 1955-56 on a comparable basis throughout. The figures for the years 1947-48, 1948-49 and 1952-53 were obtained from Censuses taken in respect of those years, whereas figures for the other periods shown are estimates based on sample surveys. To provide comparability with the 1952-53 Census an adjustment has been made in the figures originally published for hardware, china and glassware for 1948-49 and subsequent periods.

# WHOLESALE TRADE.

An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustment to be made to the crude figures on this account.

# EXPORT PRICE INDEXES.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. The index numbers show price changes in the predominant market or markets for each commodity.

## SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production in the case of gold) during the three years 1933-34 to 1935-36.

# EXPORT PRICE INDEXES—continued.

## RECENT TRENDS—EXPORT PRICE INDEX—WOOL AND "OTHER GROUPS".

Reference to the group indexes in the table on page 22 hereof shows the great fluctuations and the wide dispersion of prices of export commodities in recent years. In particular, very great movements upwards and downwards have occurred in the price of wool. Since wool is a predominant export (and comprises 46 per cent. of the Base Aggregate of the index) fluctuations in wool prices obscure the effects which movements in prices of the other components have on the All Groups index. For purposes of comparison they are shown separately below.

(Base of each Group : Average of 3 years ended June, 1939 = 100.)

NOTE.—The index numbers in the two preceding tables indicate satisfactorily the trends of export prices, but take no account of the relative quantities actually sold at the different prices ruling during each month. The impact of the price movements on current sales is indicated more directly by the index numbers below. In computing these the "quantity multipliers" are the quantities actually exported in the months (or periods) to which the index numbers relate. The index numbers for the most recent available month are :—

# WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants. With a few important exceptions they are from Melbourne sources. Apart from locally-produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

## INTERIM RETAIL PRICE INDEX.

The list of items covered by the Interim Index is representative of a high proportion of expenditure of wage earner households. It is more comprehensive than that of the "C" Series Index and some of the principal food weights and group weights differ substantially from those used in the "C" Series Index. The weighting pattern and the list of component items in the "C" Series Index relate to the pre-war pattern of wage earner expenditure and consumption, whilst those of the Interim Index relate to current conditions.

## FARM PRODUCTION PRICE INDEXES.

The annual index numbers shown in the following table relate to average "prices" of farm products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the index numbers therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The index numbers for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The index numbers shown below are the Revised Series (December, 1952) in which average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.

The preliminary index numbers for 1955-56 are based mainly on the recorded or estimated movement in average values for the major farm products. They will be reviewed from time to time as further "price" data become available.

# SHARE PRICE INDEXES.

In comparing movements in the two sets of index numbers on this page, attention should be paid to differences in the methods by which they have been constructed, and in the nature of the companies and the types of shares included in each index. These are outlined in the footnotes to the table.

(a) Compiled by the New South Wales Government Statistician : converted from original base, par values. The index numbers relate to the prices of ordinary shares on the Sydney Stock Exchange of principal companies (excluding banks) whose business in New South Wales is extensive. The prices of individual shares are unweighted and each group average is the mean of the average monthly prices per £1 of paid-up capital. Adjustments are made for changes in the capital structure of the companies. Minor revisions were made in the composition of the index in August, 1956.

(b) Compiled by the Queensland Bureau of Industry. The index numbers are based on the prices of the ordinary shares of 21 representative Queensland companies, and the preference shares of three companies whose ordinary shares are inactive. The index numbers represent unweighted averages. Mean monthly values are used. Recomputed from original base, April, 1928.

(c) These shares relate to leading companies and do not include bank shares or mining shares.

(a) Excludes suburbs of Hobart. (b) From July, 1947, includes additional areas in the metropolitan area of Melbourne. For details see September, 1954, issue of this publication. (c) From July, 1954, includes additional areas in the metropolitan areas of Sydney, Melbourne and Hobart. For details see September, 1954, issue of this publication.

NOTE.—Building controls under National Security (Building Control) Regulations operated from 5th December, 1940, becoming most stringent in 1942, when consent was required for all building other than alterations and additions costing less than £25. These controls were progressively relaxed after 1945 and have now ceased to exist in all States. For more detailed notes see earlier issues of this publication.

The "value of permits" shown above relates to the value of building permits issued by local government authorities and not to approvals granted under the Regulations.

For meaning of symbol —, see page 1.

(a) Registration in Victoria is according to purpose of use and not type of vehicle : consequently motor car registrations are overstated by the inclusion of commercial vehicles, registered for private use. Prior to 12th November, 1951, primary producers' private cars registered in Victoria were included in commercial vehicle registrations. (b) Excludes extra-Metropolitan area of Western Australia. (c) Excludes Northern Territory. (d) Includes taxis and hire cars in Victoria. (e) Includes some new registrations effected in preceding months but not passed into central registration records until subsequent months.

(a) General Banking Division of Commonwealth Bank prior to 3rd December, 1953.

(b) Averages of liabilities and assets on Wednesdays.

(c) At the beginning of July, 1952, the General Banking Division opened, in the books of the Central Bank, a special deposit account with a balance approximating the amount that would be required if it were subject to Special Account provisions of the Banking Act 1945. This represents a change in the form of liquid assets which were previously held, predominantly in Treasury Bills.

(d) Between March and July, 1952, certain loans to building societies and *crédit foncier* loans for housing were transferred from the General Banking Division to the Commonwealth Savings Bank in exchange for Government Securities. The reduction in these loans (held by the General Banking Division) over this period was approximately £24,000,000.

(e) Returns for fifth Wednesday not available.

(f) Returns for fourth Wednesday not available.

(a) To avoid duplication in aggregating particulars for the Commonwealth and States, the grand totals exclude payments by the Commonwealth to the States for compensation in respect of uniform taxation, interest on States' debts, special grants and special financial assistance, also pay-roll tax payments by States to the Commonwealth. The totals of revenue and expenditure of the States have also been adjusted.

(b) Excludes Main Roads Department, Road Transport and Traffic Fund, and recoups of interest, &c., from undertakings outside the Budget. To obtain comparability between States, Commonwealth Hospital Benefits have been excluded from annual figures.
